FINEPIX S2950

18x long-zoom bridge camera

14 Megapixels | Fujinon 18x Optical Zoom | 3.0-inch LCD

FinePix. More than you imagined.

Fujinon 18x Zoom Lens

Equipped with a versatile 18x zoom, the FinePix S2950 lets you zoom right in to capture your subject with picture-perfect results.

28mm Wide Angle

5x Optical Zoom

18x Optical Zoom

14 Megapixels

The FinePix S2950 captures ultra high-resolution photos and videos, great for enlarged prints or big-screen display.

3.0-inch LCD & EVF

A bright 3-inch LCD screen makes composing and viewing images a pleasure. And to accommodate more traditional shooting styles, the FinePix S2950 is also equipped with a crisp, clear electronic viewfinder.

SR AUTO AUTO with Automatic Red-Eye Removal

The FinePix S2950 automatically recognizes six of the most commonly photographed scenes and optimizes camera settings for beautiful results every time. And red-eye removal eliminates unsightly red-eye reflections to ensure flattering flash portraits and party pictures.

Natural Light & with Flash

Not sure whether you need the flash? Natural Light & with Flash takes two photos in quick succession, one with flash and one without, eliminating the guesswork of flash photography.

Dual Image Stabilization

No more blurred and disappointing photos! Combining CCD-shift image stabilization with high sensitivity, the FinePix S2950 greatly reduces the effects of camera shake and subject blur to deliver crisp, clear shots across the entire zoom range.

Conventional digital camera

FinePix S2950

Motion Panorama Mode

Take impressive panorama photos as simply as "1", "2", "3"! The FinePix S2950 automatically stitches together three consecutive shots, with simple in-frame guidance to ensure the images are aligned.

Instant Zoom

A selectable frame on the LCD screen lets you bracket and track moving subjects in standard wide view.

Zoom Bracketing

Take three shots at varying degrees of magnification (original, 1.4x, 2.0x) with a single press of the shutter button.

Smile & Shoot Mode

In "Smile & Shoot" mode, the FinePix S2950 automatically triggers the shutter button and takes a photo when a smile is detected, giving you portraits to smile about.

Blink Detection

In this mode, the FinePix S2950 warns you when people in the frame blink, giving you the option to retake the photo, or enlarge the face so you can save or delete before you take the next shot.

Tracking AF

Great for capturing dynamic close-ups, this function keeps fast moving subjects in the frame and in focus, even when the zoom is fully extended.
